BOARD OF PUBLIC WORKS

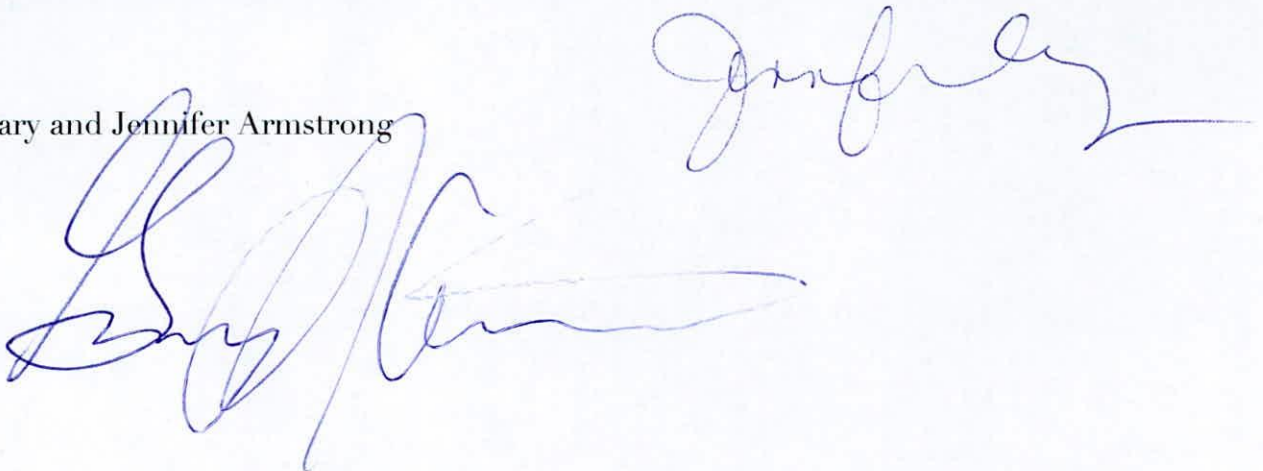

Secretary Bose,

We are strong supporters of Dominion Cove Point, and have urged many of our elected officials to do all they can to support their project moving forward. The fact of the matter is, that they are doing a valuable service to our own economy and to the world. Most everyone can agree that the jobs and tax revenue they will provide would make a huge difference for this county and this region, and they would be providing a clean source of energy to Japan and India, thereby paving the way for a much more environmentally friendly future worldwide.

They have thoughtfully planned out their operation and have taken great care to strategically manage the traffic and road safety, and all of their operations will be built within the existing terminal footprint. All of these facts, plus your well-researched environmental report, only point to one clear logical move: lend your final approval to Dominion's project today, and let's get on with building a better future for us all.

Thank you for your time and consideration,

Gary and Jennifer Armstrong

The block contains two handwritten signatures in blue ink. The signature on the left is a large, stylized cursive signature, likely belonging to Gary Armstrong. The signature on the right is a smaller, more compact cursive signature, likely belonging to Jennifer Armstrong.
